

KEVIN LIN

Phone: 402-840-0137 | Email: kevinlingc1120@gmail.com | Profile: <https://kevinlin1234.github.io/>

PROFESSIONAL SUMMARY

- Having 5 years of experience in developing Web Applications using HTML (4/5), CSS (2/3), JavaScript, TypeScript, Angular (2/4/5/6), jQuery, AJAX, XML, Bootstrap, JSON, Java/J2EE.
- Experience in working with Angular6 modules, services, templates, directives, services and dependency injection to create a SPA.
- Proficient in Developing User Interface (UI) Rich Web Applications, and Web Service Applications using Front End/User Interface (UI) Technologies like Object Oriented JavaScript, TypeScript, Angular6, AngularJS, Bootstrap, Media Queries, CSS Frameworks, Java.
- Good experience in unit testing by using Jasmine, Karma and Mocha.
- Expertise in Java programming and have a good understanding on OOPs, Collections, Exceptions Handling, Input/output (I/O) System, Annotations, Enum and Generics.
- Experience in Developing Application using frameworks Spring Dependency Injection (DI), IOC, MVC, Boot, REST, Struts and Hibernate.
- Expertise in producing and consuming Web Services Technologies like Restful (JAX-RS).
- Expertise in creating Stored Procedures, T-SQL Queries, Triggers and Views in SQL Server, Oracle, MySQL and had knowledge about NoSQL databases like MongoDB.
- Extensively used the repositories like GIT and SVN for software version control.
- Good Knowledge in Continuous Integration (CI) tools like ANT, MAVEN and Jenkins.
- Experienced with Software Development Processes & Models: Agile & Scrum Model.
- Having very strong interpersonal skills and ability to work independently and within the group, can learn quickly and easily adaptable to the working environment.

SKILLS

Web Technologies: Angular6, TypeScript, HTML5, CSS3, Bootstrap, JavaScript, jQuery and AngularJS

Enterprise Technologies: J2EE, Servlets, JSP, Spring Boot, Spring MVC, ASP.NET, Web API Framework

Version Controls & SDLC Methodologies: TortoiseSVN, TFS, GIT

Languages & Database: Java 8, PL/SQL, Oracle 11g, SQL Server, XML, T-SQL

IDE Tools & Web Servers: Eclipse, Visual Studio Code, IntelliJ

Testing & Others: Mocha, Chai, Jasmine, Fiddler, JUnit, JIRA, UAT, ANT and Maven

EXPERIENCE

JAN 2020 - CURRENT

Full Stack Web Developer | BNY MELLON | Jersey City, NJ

Description: NEXEN is a financial services platform developed by BNY Mellon. It features a web application, APIs, and data analytics tools to allow financial services clients to access the BNY Mellon's services, such as asset custody, broker-dealer services, and alternative investment services.

Responsibilities

- Responsible for creating efficient design and developing User Interaction screens using HTML, CSS3, Bootstrap, Typescript, and Angular6.
- Implemented Angular Router to enable navigation from one view to the next as user performs application tasks.
- Created Typescript reusable components and services to consume REST API's using Component-based architecture provided by Angular.
- Implemented latest EcmaScript6 (ES6) features like arrow functions, constants, block-scope variables and class inheritance etc.
- Utilized the features of Angular6 to present effective web design.
- Worked on customizing the Angular-Material classes using CSS preprocesses like SASS and made use of NPM task runner to compile SASS files to CSS, Linting, minify files and compress images.
- Involved in development of REST Web Services using Spring MVC to extract client related data from databases.
- Involved in various phases of Software Development Life Cycle in Agile environment.

Environment: Java, Eclipse, Angular6, VS Code, TypeScript, Bootstrap, HTML5, CSS3, Spring Framework, Oracle, Restful Webservices, GitHub, JIRA, Jasmine, Agile (Scrum).

AUG 2017 - MAY 2019

Full Stack Web Developer | University of Nebraska-Lincoln | Lincoln, NE

Responsibilities

- Designed dynamic and multi-browser compatible pages using HTML5, CSS3, AngularJS & JavaScript.
- Used AngularJS components like modules, controllers, and built-in and synchronizing models with single page Applications (SPA).
- Used Bootstrap for layout as well as responsive design and SASS for Responsive design.
- Defined new validations through AngularJS for the form field validation implemented through HTML5.
- Develop various screens for the front-end using AngularJS and used various predefined components from NPM (Node Package Manager) library.
- Worked with advanced MVC framework such as Spring-IOC, MVC and Boot which is used for eliminating bootstrapping process in spring-based application.
- Working on the unit test cases to test the functionality of the code written in component and DOM level using Karma test runner and Jasmine framework.
- Developed Restful service interface using Spring MVC to the underlying customer event API.

- worked with Oracle as application backend database and connected to the application.
- Used MAVEN for developing build scripts and deploying the application onto WebLogic.
- Used version control tools like Git for managing the code changes and JIRA for issue and bug tracking purpose.
- Contributed greatly to increase code quality and productivity through Agile Estimation.

Environment: Java/J2EE, Eclipse, AngularJS, Bootstrap, Spring Framework, Restful Services, HTML5, CSS3, JavaScript, Oracle, Jasmine, Karma, Agile, GitHub, Maven.

MAY 2012 - MAY 2014

Full Stack Web Developer | Sinosoft | Beijing, China

Responsibilities

- Created web pages according to the client's guidelines and standards throughout the development and maintenance of the website using HTML, CSS, jQuery, Java, and JavaScript.
- Worked on CSS to change the styles to be used in future web layouts and debugging the error issues with CSS.
- Performed Spring MVC framework for the application development which includes writing Controller classes for handling requests, processing form submissions and perform validations.
- Implemented microservices-based architecture using
- Spring Boot interacting through REST API.
- Developed the Maven scripts for preparing WAR files used to deploy J2EE components.
